

introducing *Rustique II*

Precision engineered, superbly fabricated and beautifully finished, this is our new 'ovolo' sculptured window and door suite.

Designed to complement our existing System 10 and Esthetique suites, this new system is available from June 2nd 2008. We believe we can now offer a window to suit every taste.

Rustique II is available in the same range of finishes as the other suites and with the same locking and glass options.

The new Rustique II system features internally fitted single-leg beads for ease of glazing, five chamber construction, concealed PCE gaskets, and excellent thermal and security performance.

Contact us now for a sample and sales support literature and give your sales the Rustique II advantage.
